

Prepared for Capital Asset Management

The Monday Signal Report

No signal, no send.

the ones worth a call

the rule the whole system runs on

Market

Phoenix Metro

Week of

June 29, 2026

6 signals flagged

4 high / 2 medium

Focus

Industrial-led

Target & contact	Signal	What it surfaces	Score	Move · feeds · assets
Loop 303 big-box ±1.1M SF · industrial Contact · [owner resolving]	Developer pulled a distribution permit; new interchange funded	A pre-lease target before the shell tops out.	High	Development leasing — pitch the pre-lease now. [One-pager][Email draft][Call script]
Tolleson industrial ±140,000 SF · industrial Contact · [owner resolving]	Loan matures in 68 days	Refi is tight; a sale or recap is likely.	High	Brokerage — acquisition or recap intro to ownership. [One-pager][Email draft][Call script]
SW distribution center ±310,000 SF · industrial Contact · [owner resolving]	Anchor 3PL lease expires in ~5 months	A renewal to protect — or a re-lease to win.	High	Retention / re-leasing — get ahead of the expiry. [One-pager][Email draft][Call script]
Deer Valley industrial Single asset · industrial Contact · [receiver resolving]	Receivership order recorded	An asset that needs a manager now.	High	Receivership pipeline — quiet outreach to the receiver. [One-pager][Email draft][Call script]
Chandler power center Multi-tenant retail Contact · [owner resolving]	Sold to an out-of-state buyer three weeks ago	New owner, no local operator, standing vacancy.	Med	New assignment — pitch management + leasing. [One-pager][Email draft][Call script]
Gateway South parcels ±22 acres · land Contact · [owner resolving]	GPA / PAD application filed; adjacent parcel tax-delinquent	An assemblage play before the market connects it.	Med	Site acquisition — move on the assemblage. [One-pager][Email draft][Call script]

This week: Phoenix industrial. The same engine covers retail, office, land, and management.

What lands on the agent's desk

No signal, no send.
nothing leaves without a person

A signal isn't a to-do — it's a ready-to-act package. Here's the top industrial opportunity from the list, expanded into the brief and the three assets an agent sends the same morning. **The research is done. The agent just approves.**

FEATURED OPPORTUNITY · TOP INDUSTRIAL SIGNAL

LOOP 303 CORRIDOR · PHOENIX

Loop 303 big-box distribution — ±1.1M SF planned

Developer pulled the distribution permit and the new interchange is funded — demand is landing here first, with a pre-lease window open before the shell tops out. The owner is a single-asset LLC; the decision-maker is being resolved now.

Suggested move: Pitch the pre-lease / development-leasing assignment now.

Contact: [decision-maker — Owner Resolver locating]

[ONE-PAGER]

[Industrial one-pager]

"We recently leased 20,000 SF two miles away."
— the proof piece, attached to the send.

[EMAIL DRAFT]

Subject: 20,000 SF just leased near your Loop 303 site

[2–3 line placeholder — the nearby comp, the pre-lease timing, one clear ask.]

[CALL SCRIPT]

[Opener — name the permit + the nearby lease.]

[Value — the pre-lease window, and why now.]

[Ask — 15 minutes this week?]

Every signal on the list ships as this same package — **brief, one-pager, email, call script**. The agent's only job is the last mile:

- 1 · Review

Read the brief and the draft — about a minute.
- 2 · Approve or edit

Keep your voice; change anything before it goes.
- 3 · Send

The one-pager attaches itself; replies land on the calendar.

How it's built

The engine watches your market for rezonings, permits, ownership changes, distress filings, and lease expirations — and your smart front door does the same for inbound. Each signal is scored against CAM's criteria, ranked, and shipped with the assets an agent needs to act. **You decide what sends.** The research and prioritization are automated. The relationships stay yours.

One assignment this surfaces covers a year of the system.

Sample format shown with illustrative signals. Live reports are populated with verified signals from your target market, delivered every Monday morning.
